

Introduction

While Decentralized Finance (DeFi) continues to make waves and maintain its parabolic growth, yield farming remains a popular tool for generating returns from long-term holdings. For the uninitiated, yield farming is simply the act of staking your assets into a platform to earn yield.

Our vision is to be a leading matrix farm on the Binance Smart Chain platform, possessing transparent and fair metrics and bringing many returns.

Tokenomics

QTM on Binance Smart Chain

Name: [QuantumToken](#)

Symbol: *QTM*

Decimals: **8**

Smart Contract:

0x9a99eA92Ed1e0c963078ac5c0867dF85e
C6d06B7

We choose Binance Smart Chain as the main platform rather than Ethereum for Yield farming because Ethereum has been facing extreme network congestion. Gas price has increased dramatically, even for simple transactions. Increasing the gas price has made it impossible for many users to use the Ethereum blockchain because it is no longer economically viable. Therefore, we choose the Binance Smart

Chain platform, which will be better for all users of [QuantumToken](#).

DeFi on Ethereum is mainly given to more giant whales who have hundreds of thousands of dollars. They will gradually migrate to the Binance Smart Chain Network in the future, which is the leading advantage of QTM.

NFT Marketplaces

The type of Yield farming that doesn't interest you is a bunch of NFTs. We allow users to create their own NFTs, buy and sell NFTs with QTM on the NFT Marketplace platform. You will enjoy it. It will be

COMMUNITY

If you'd like to donate to the Devs, send ETH, BNB, MATR here.
